The solar EUV

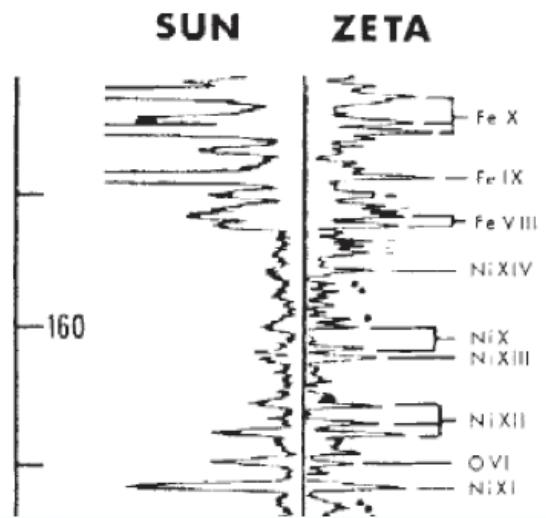

'You could spend a lifetime to understand this spectrum' (P. Storey)

Solar corona in the EUV

NATURE

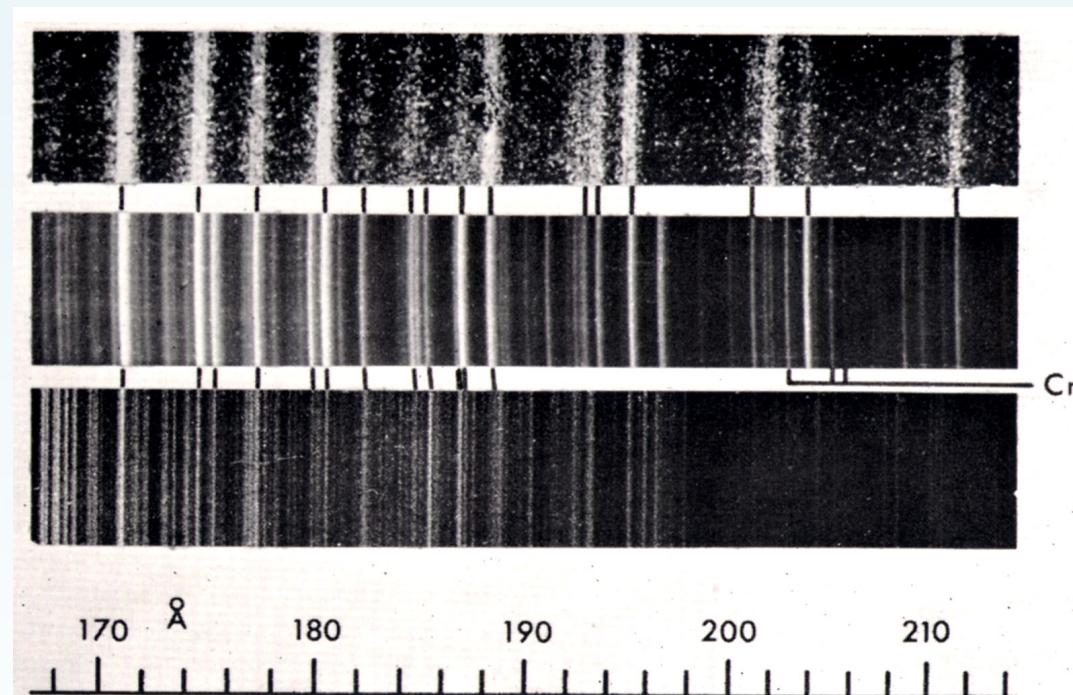

May 22, 1965

Gabriel & Fawcett (1965)

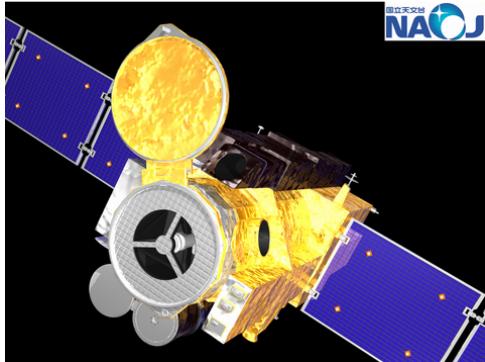

Sun

ZETA
iron
spark

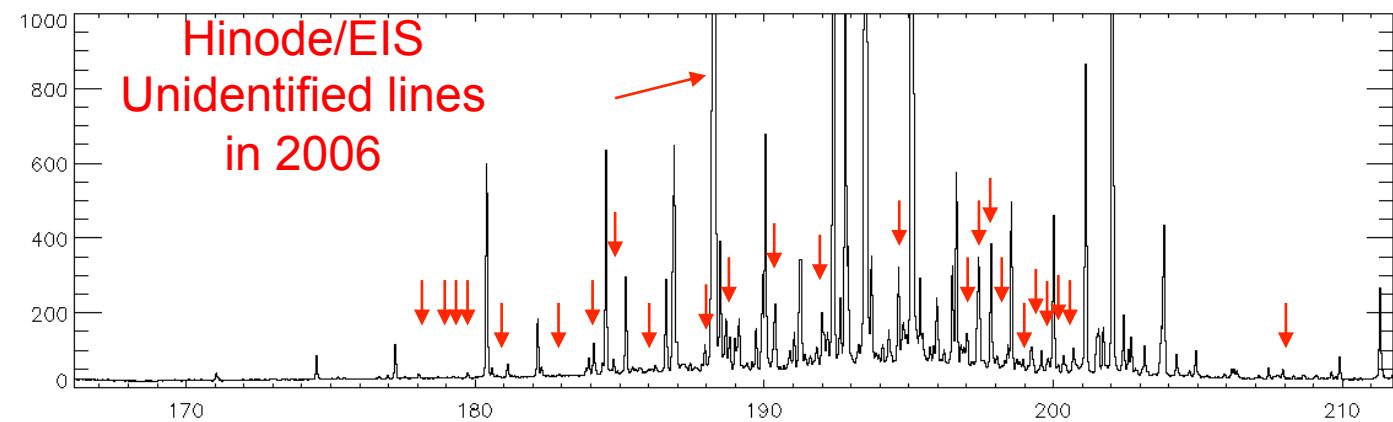

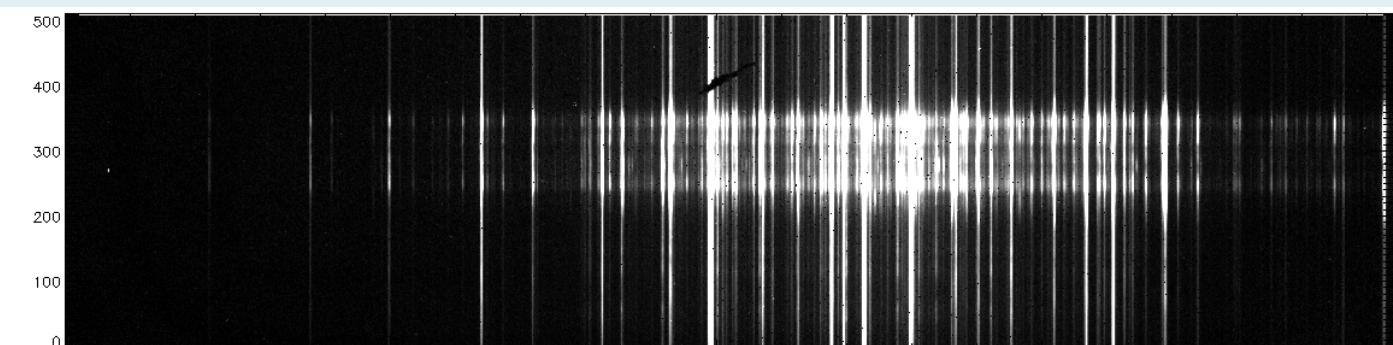

Fawcett, Gabriel & Jordan (1965)
 $3p^n - 3p^{n-1}3d$ transitions in Fe IX to Fe XIV

Hinode EIS and Culham plates

Resolution almost
as good as Culham
plates which were
key for the
identifications.

Del Zanna (2011):
most brightest
coronal lines finally
identified after 8
years!

Benchmarking atomic data (Del Zanna 2003-date)

- 1) Find the best atomic structure.
- 2) Calculate e excitation rates (R-matrix) and build ion model to calculate line intensities.
- 3) Compare observed and theoretical wavelengths and intensities for low- and high-density plasmas.

RESULTS: a large number of new identifications and revised wavelengths (with uncertainties). New Ne, Te diagnostic applications

- Fe VII: Del Zanna (2009a) [new IDs](#), [new Te diagnostics](#)
- Fe VIII: Del Zanna (2009b) [new IDs](#), [new Te diagnostics](#)
- Fe X: Del Zanna+ (2004, 2012) [new IDs](#), [new Te diagnostics](#)
- Fe XI: Del Zanna (2010,2012) [new IDs](#), [new Te diagnostics](#)
- Fe XII: Del Zanna & Mason (2005); Del Zanna (2012) [new IDs](#)
- Fe XIII: Del Zanna (2011a) [new IDs](#)
- Fe XIV: Del Zanna (2012) [new IDs](#)
- Fe XVII: Del Zanna & Ishikawa (2009) [new IDs](#) ; Del Zanna (2011): [new Te diagnostics](#)
- Fe XVIII: Del Zanna (2006) [new IDs](#), [new Te diagnostics](#)
- Fe XXIII Del Zanna et al. (2005) [new Ne,Te diagnostics](#)
- Fe XXIV Del Zanna (2006) [new Ne,Te diagnostics](#)

Atomic data calculations and distribution

STFC-funded UK **APAP Network** <http://www.apap-network.org/>
has become the main atomic data provider.

N. Badnell, L Fernandez-Menchero (Strathclyde),
P. Storey (UCL), H. Mason and G. Del Zanna (Cambridge)

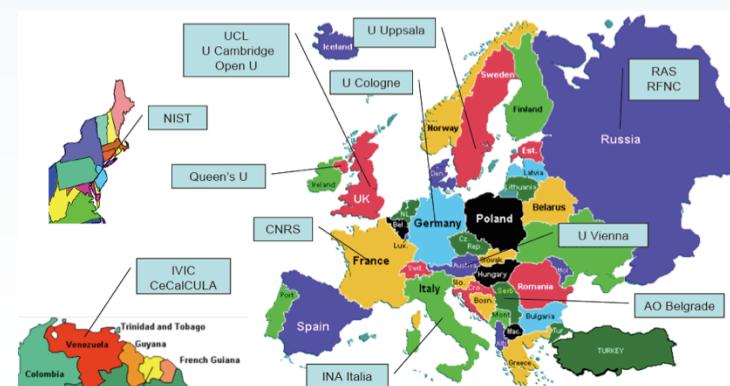

Electron impact excitation data have been produced with large-scale R-matrix calculations for all ions of astrophysical importance of **the H-, He-, F-, Na-, Ne-, Li-, and B-like isoelectronic sequences**, as well as for a large number of individual ions, in particular **Fe VII, Fe VIII, Fe IX, Fe X, Fe XI, Fe XII, Fe XIII, Fe XIV, Fe XVII, Fe XVIII, Fe XX, Fe XXIII**

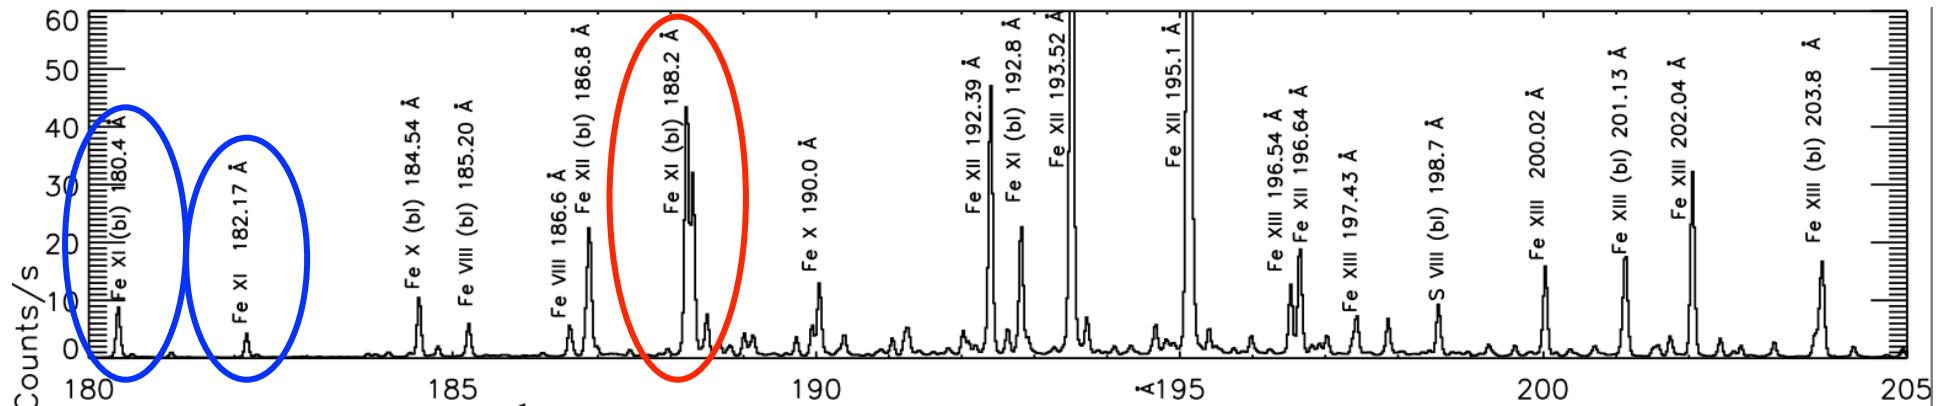

DISTRIBUTION:

-**CHIANTI** (www.chiantidatabase.org) has now become the reference atomic database for ions, world-wide, with hundreds of citations per year.

-**VAMDC** (Virtual Atomic and Molecular Data Center)
<http://portal.vamdc.eu>

Gabriel et al.(1966)

Fe XI benchmark: Del Zanna (2010)
31 (out of 60) new line identifications

'Direct' temperature diagnostics

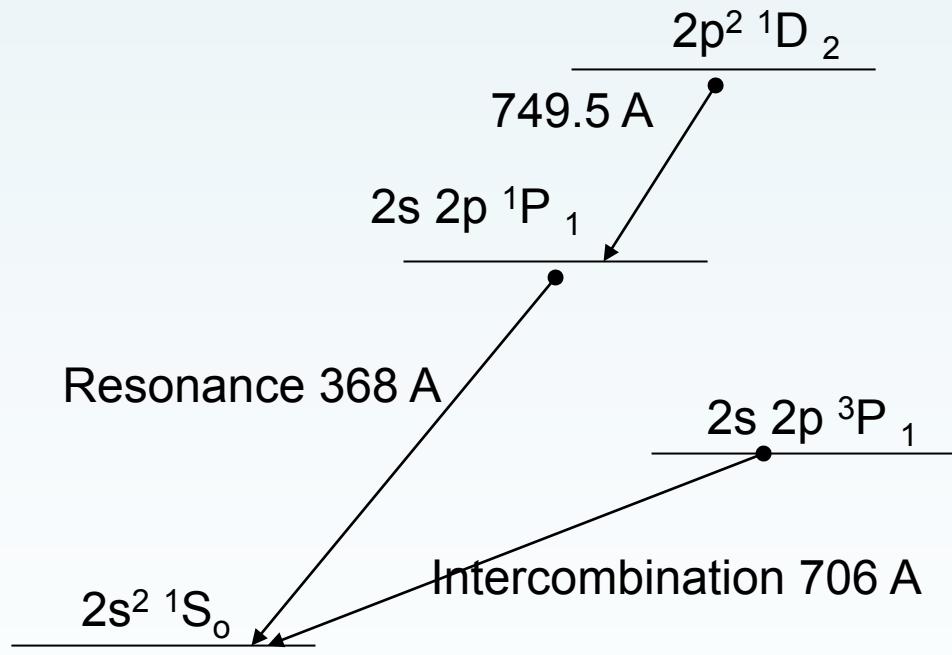

Ratios of lines with very different excitation energies.
O VI SOHO CDS GIS and SUMER
David, **Gabriel**, Bely-Dubau, Fludra, Lemaire, Wilhelm (1998)

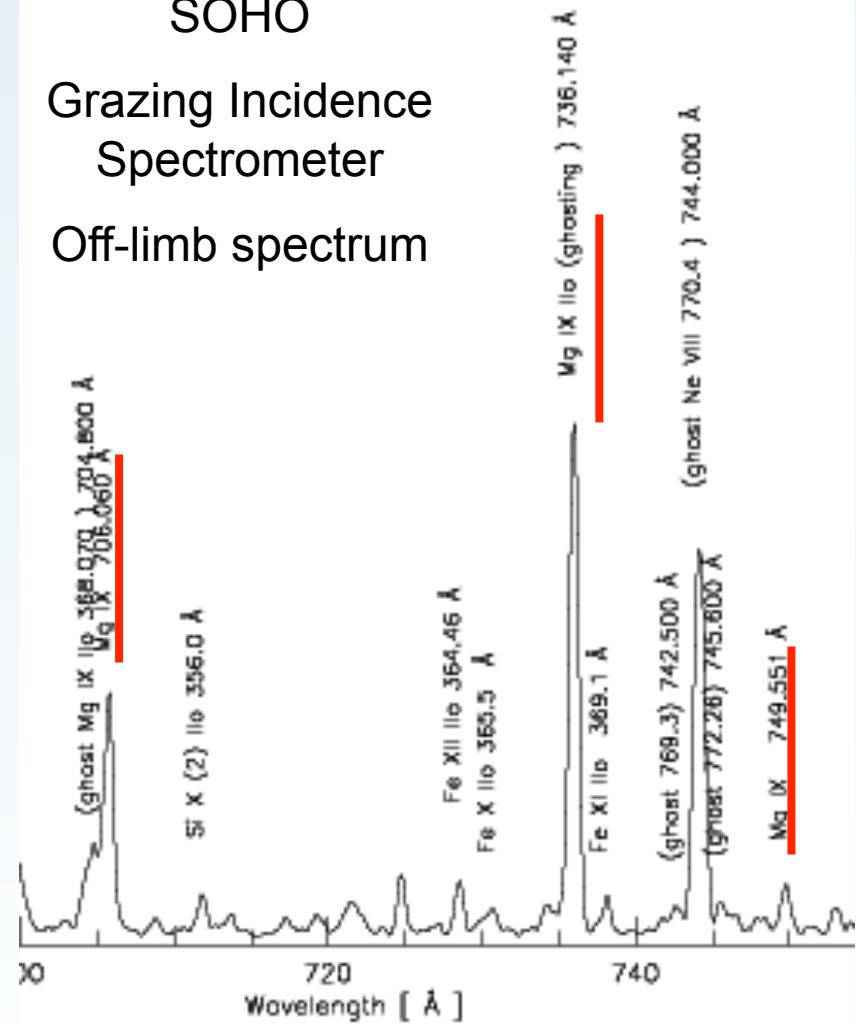

Te from Mg IX

First atomic calculation for Mg IX
(Del Zanna+2008) resolved significant
discrepancies

Best(?) Te diagnostic for the 1 MK corona
(Solar Orbiter SPICE)

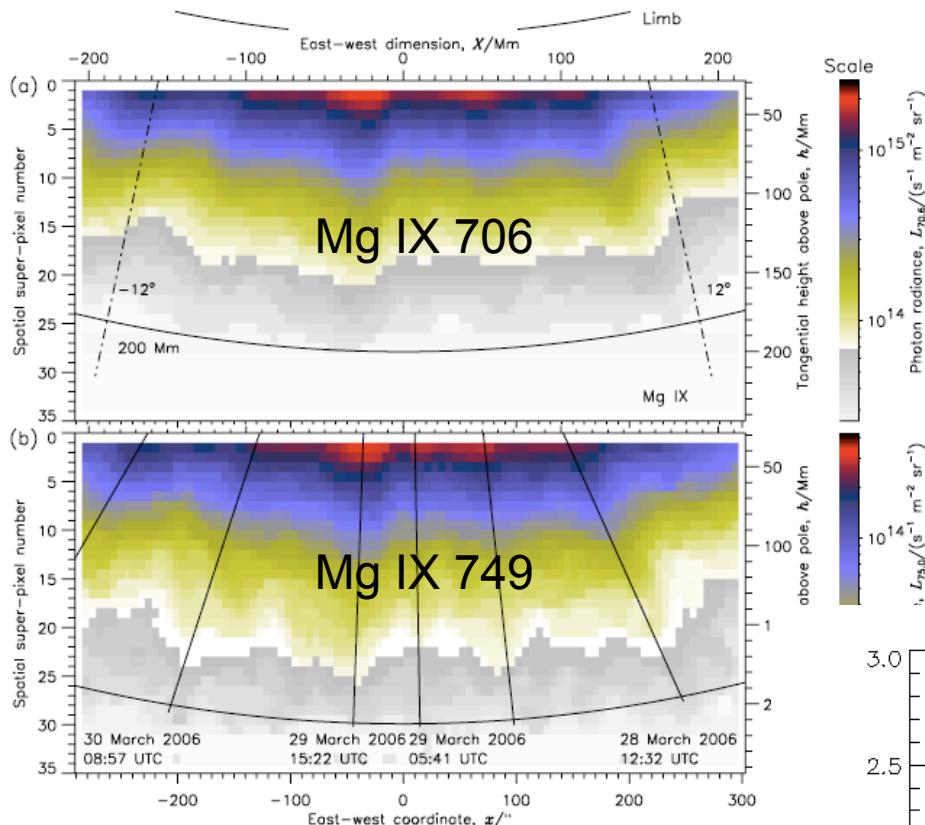

SOHO
Grazing Incidence
Spectrometer
Off-limb spectrum

Del Zanna (1999 - PhD thesis)

Te in coronal holes

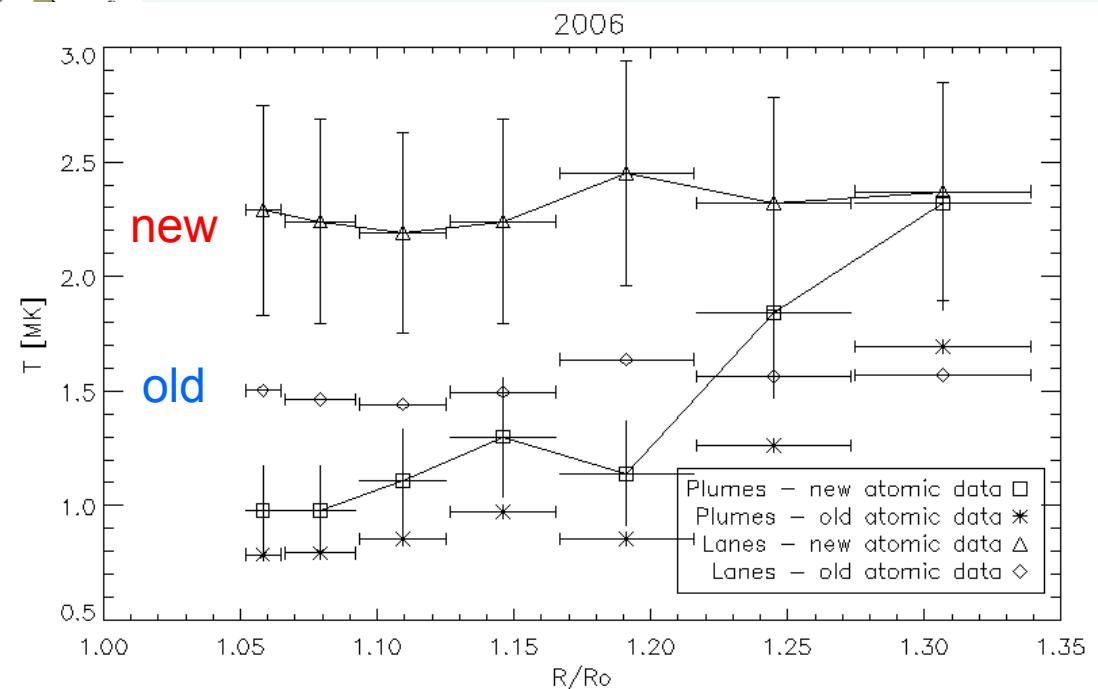

SUMER (2006)
 ‘New’ Te obtained including
 photoexcitation and (small)
 density effects.
 (Del Zanna, Teriaca, Wilhelm)

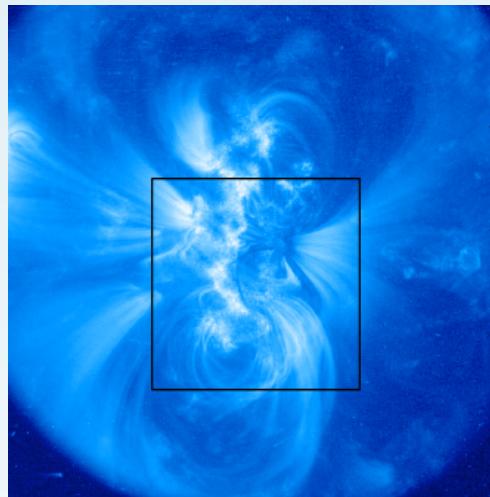

Temperatures with the new atomic model are higher.

E.g. an inter-plume

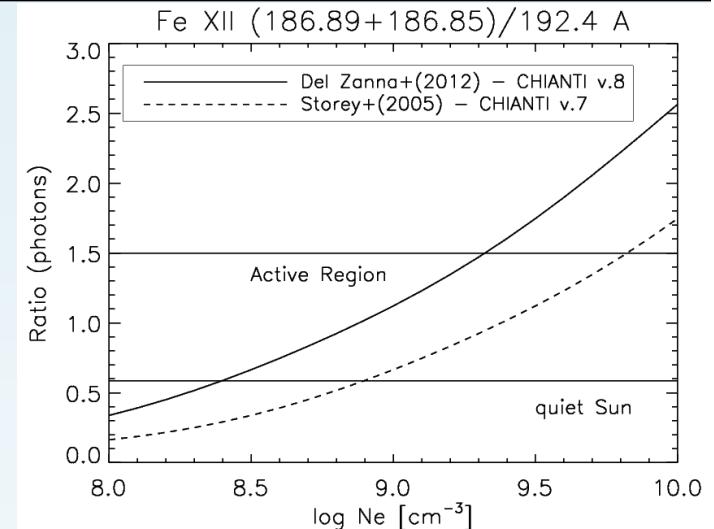

$\text{Te}=850\,000$ at $1.3R$ revised to
 $1\,160\,000$ K (Del Zanna+2008)

Measuring Ne in a solar active region

Hinode/EIS Fe XII line ratios provide accurate density maps but we sorted the atomic data only in 2012!

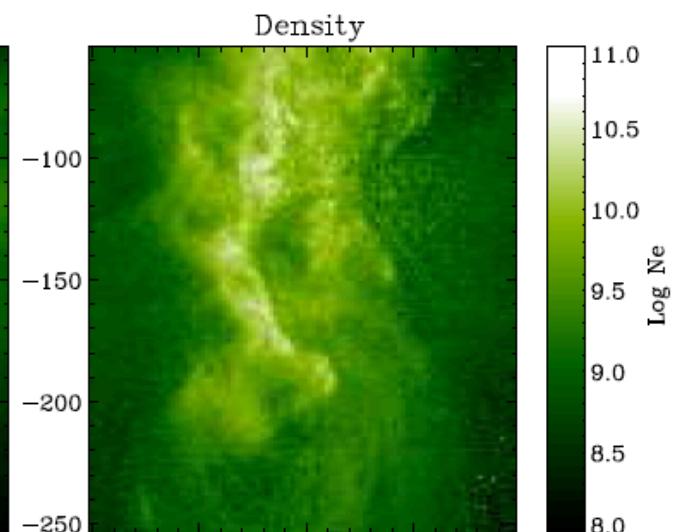

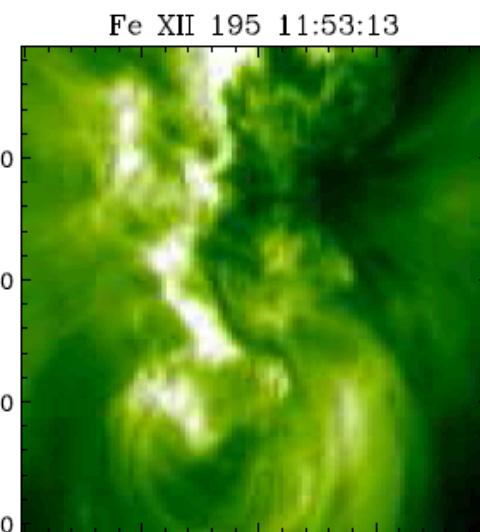

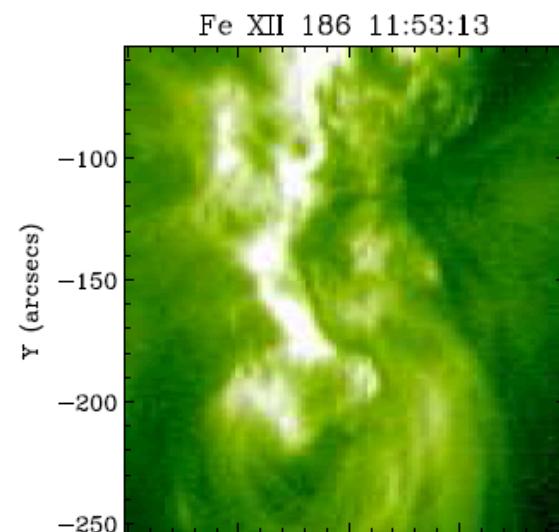

Self-blend decay
to excited state

(Del Zanna & Mason 2005)

Self-blend decay
to ground state

(Del Zanna & Mason 2005)

Density

G. Del Zanna - IAS 2013

Tripathi et al. (2009)

Long life to Alan and all spectroscopists !

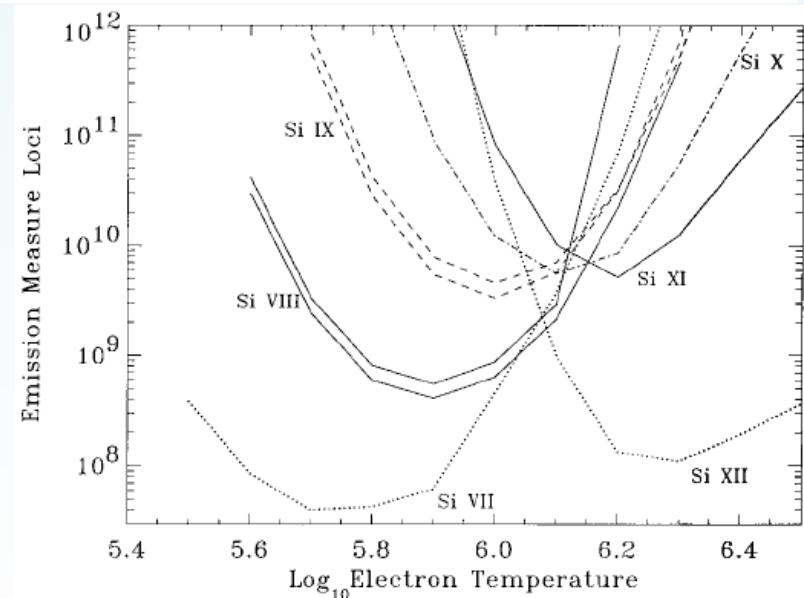

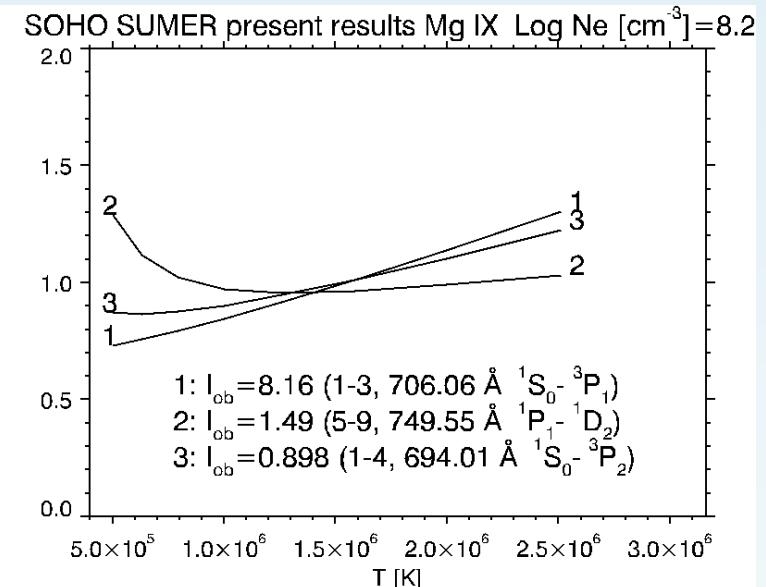

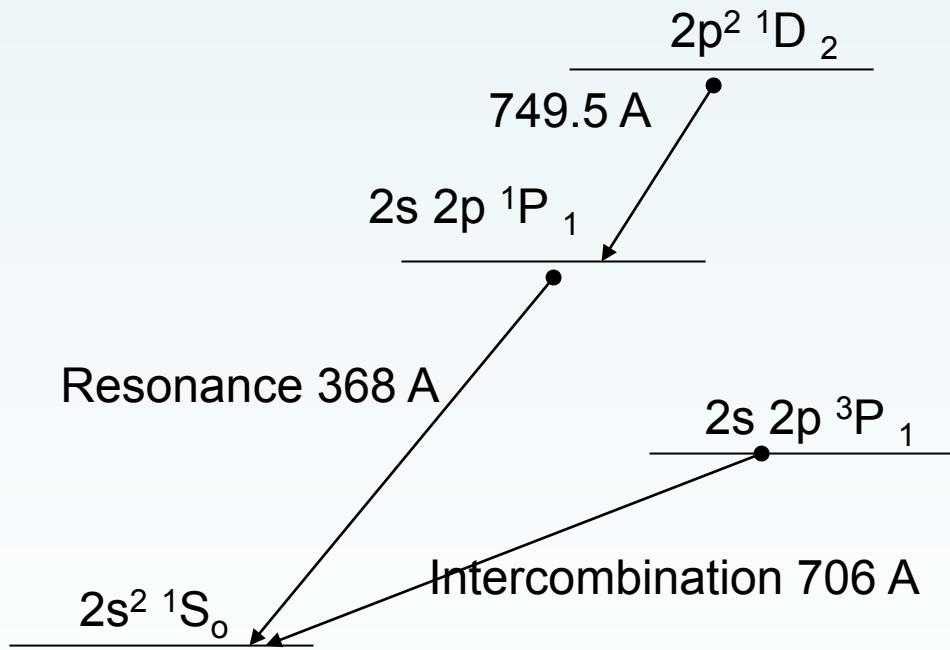

Alan always has his priorities right !

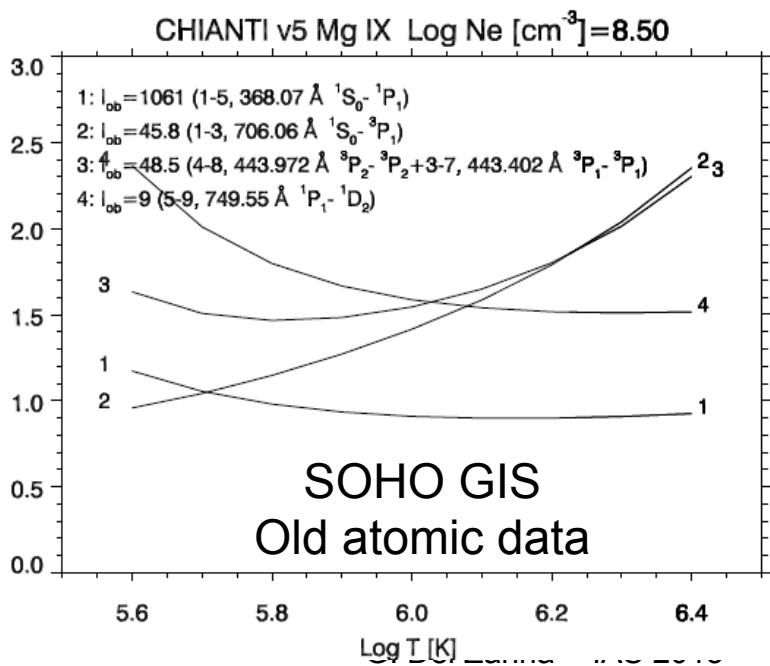

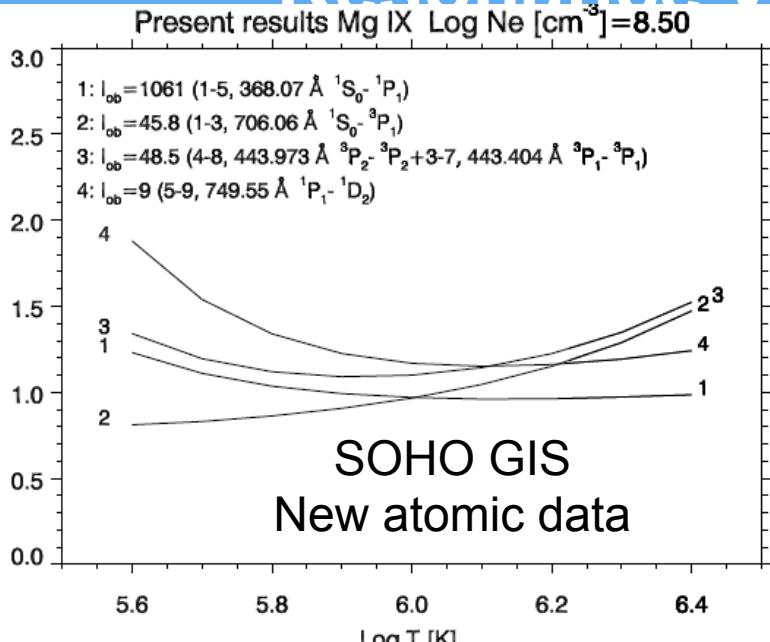

EXTRA SLIDES

Te from Be-like Mg IX

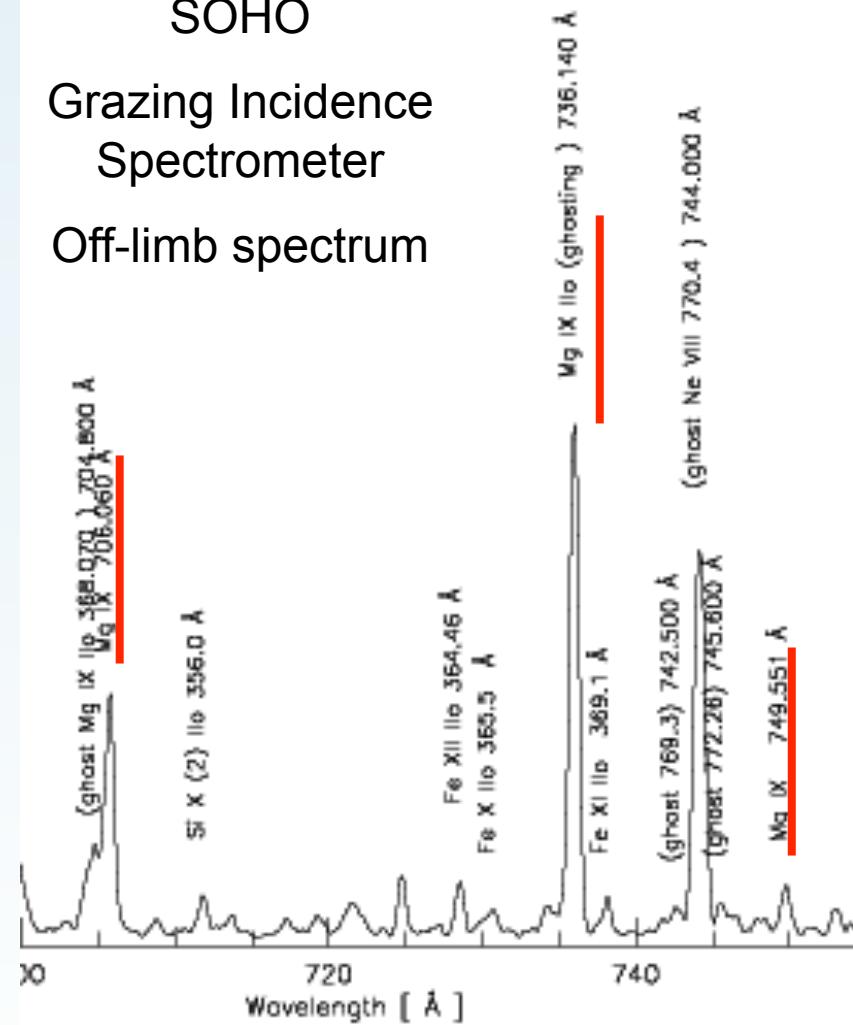

Best Te diagnostic for the 1 MK corona.
 First R-matrix calculation for Be-like Mg
 (Del Zanna Rozum Badnell 2008) resolved
 significant problems: Te in CH underestimated
 by a factor of 2

Resonance vs. intercombination

SOHO
Grazing Incidence
Spectrometer
Off-limb spectrum

Del Zanna (1999 - PhD thesis)

Fe XII

Del Zanna (2012): the population of the $3s^2 3p^3 2D_{5/2}$ is 50 % higher than previous models (Storey et al. 2005; Del Zanna & Mason 2005)
